ARTIS PILACS

Engineering & Technology Specialist | Portfolio CV Sample

github.com/artispilacs | Latvia

PROFESSIONAL PROFILE

Technology-focused professional profile with an interest in engineering, software development, computer networks, and automation. Motivated by practical problem-solving, continuous learning, and turning technical ideas into useful solutions.

CORE TECHNICAL SKILLS

Programming & Web: HTML5, CSS3, Sass, C/C++, SQL, Git and GitHub

Engineering & Systems: MATLAB, microcontroller fundamentals, automation concepts

Networking: IP addressing, VLANs, routing and switching fundamentals

Professional: Technical documentation, analytical thinking, collaboration and troubleshooting

SELECTED PROJECTS - ILLUSTRATIVE EXAMPLES

Responsive Personal Portfolio - Built a one-page website with HTML and CSS, responsive layouts, project summaries and GitHub integration.

Network Configuration Lab - Practised VLAN configuration, inter-VLAN routing, switch management and connectivity testing in a simulated environment.

Engineering Programming Exercises - Explored C/C++ programming, MATLAB models and microcontroller-based logic for technical learning.

EDUCATION & PROFESSIONAL DEVELOPMENT

Engineering and Information Technology Studies - Example study focus: software, networking, automation and applied engineering.

Ongoing Learning - Independent practice through coursework, coding exercises and technical projects.

PROFESSIONAL GOAL

To collaborate on practical engineering and technology projects, strengthen technical expertise, and contribute to reliable, user-focused solutions.

DEMONSTRATION CV: This document is an AI-generated sample for a university portfolio assignment. Project descriptions, skills and education wording are illustrative and should not be treated as verified professional credentials.
